

Overview

- Manage big, distributed, highly loaded installations
- The Zabbix Certified Professional course provides information technology professionals with the knowledge and skills necessary to configure and use Zabbix proxy and distributed monitoring for your network and application monitoring needs, as well as discusses advanced Zabbix topics.
- Duration: 2 days
- Requirements: Zabbix Certified Specialist exam
- Next level: Zabbix Certified Expert (Level 4)
- Price: 1.450,- €

Course program Day 1

- Data collection: Database monitoring
- Automation: LLD - discovery of host resources, Windows services
- Automation: discovery using SNMP and SQL
- Data collection: VMware monitoring
- Data collection: Java monitoring
- Configuration: Trend prediction, percentile
- Configuration: Bulk metrics and dependent items
- Configuration: Item value preprocessing
- Q&A

Day 2

- Automation: Network discovery
- Automation: Auto-registration
- Configuration parameters: Zabbix server, Zabbix agent
- Installation: Distributed monitoring - Active/Passive proxies
- Installation: Encryption in Zabbix
- Installation: Docker images
- Administration: Scaling and performance tuning
- how to monitor millions of metrics and millions of triggers
- Administration: Maintenance and operations - best practices, DB sizing, upgrades
- Administration: Problems, challenges and solutions - integration with 3rd party systems, performance, maintenance issues

Certificat

- Course attendance certificate
- Certification after Exam
